Dan,

Good Morning!

Yesterday, 12/7, we were informed that contractors/subcontractors will be at the PROTECO Site tomorrow to work on the fence (i.e. repairs, installation). I'm planning to be at the site to coordinate cattle removal, if needed. Last week, Jaime and I, discussed, that it may be necessary to leave and an ingress/egress point open (an existing gate was identified as a potential point) to facilitate cattle removal, in the case cattle is found be trapped during the repairs. However, it is unclear, if that information has been shared with contractors/subcontractors and if this recommendation has been evaluated/approved by the PRPs' Parties Group. In addition, please, provide the following information to plan the rest of the week accordingly.

1. Task leader/contact's name
2. Phone number
3. Work schedule

If you have any questions and/or comments, please let me know.

Thanks,

Zolymar Luna Díaz
